This course reviews all subject areas from the NEC applicable to the SP-LV (special low voltage test) examination, as well as administrative requirements of the NCBEEC. The course concentrates on the NEC requirements for the installation of low-voltage and power-limited circuits for security and fire alarm systems, including video surveillance systems using coaxial cable. Major emphasis is placed on Article 725 and article 760 Installation Methods. Students should have a better understanding of installation and wiring methods of these systems, including other requirements from related NEC articles. This course covers NEC, in great detail and is very fast-paced. It will help people who need to pass the examination, as well as new and old employees you have in your company. This is an 8-hour course, approved by the NC Electrical Board only.

Member Fee: \$150.00

Non-Member Fee: \$200.00

Late Registration Fee-Member: \$185.00

Late Registration Fee Non-Member: \$250.00
